# Information zu Motorradlenkern und Gutachten

## Lenkerempfehlung:

Die Auswahl eines Lenkers ist von den körperlichen Gegebenheiten des Fahrers, der gewünschten Sitzposition und von weiteren Faktoren und Anbauteilen wie Riser, Gabelbrücke, Fußrastenanlage, Sitzbank, Lenkererhöhungskits usw. abhängig. Aus diesem Grund können wir keine Empfehlung bei der Lenkerauswahl geben.

## Passt der Lenker mit den originalen Bremsleitungen, Seilzügen und Elektrokabeln:

Wir haben keine Informationen darüber welcher Lenker sich auf welchem Motorrad mit den originalen Bremsleitungen, Seilzügen und Elektrokabeln montieren läßt, oder ob sie verlängert werden müssen. Wir empfehlen Ihnen eine Beratung in einer erfahrenen Werkstatt.

Eine Ausnahme sind Lenker mit ABE (ohne Anbauabnahme). Hier passen die Lenker bei den in der Verwendungsliste aufgeführten Motorrädern ohne weitere Umbauten, wenn sich das Motorrad im Originalzustand befindet.

## Anbau der Armaturen:

Unsere Lenker haben keine Bohrungen für die Fixierung der Armaturen und keine Gewinde für Lenkergewichte. Bohrungen für die Armaturenfixierung müssen je nach gewünschter Stellung der Armaturen selbst angebracht werden.

Handelsübliche Lenkergewichte mit Klemmvorrichtung können angebracht werden.

## Kürzung der Griffenden bei unseren Lenkern:

Von unserer Seite gibt es keine Bedenken gegen eine Kürzung der Griffenden. Voraussetzung ist das die Griffenden auf beiden Seiten um die gleiche Länge gekürzt werden und daß das verbleibende Griffstück zur Aufnahme der Armaturen lang genug ist.

Wir empfehlen Ihnen eine Kürzung vorher mit dem Prüfer abzusprechen. Unter Beachtung der in dem TB / TGA aufgeführten Anbauhinweise bestehen unsererseits keine Bedenken gegen eine Eintragung.

## Gutachten:

Auf unserer Website können Sie unter "Service" aktuelle TB / TGA herunterladen. In jedem TB / TGA finden Sie eine Auflistung der Punkte, die bei einem Umbau zu beachten sind.

Bei einigen Lenkern werden 2 Gutachten mitgeliefert. Im TGA ist der Lenker geprüft, im TB ist die Erweiterung um die spezielle Variante des Lenkers enthalten.

Auf der Rückseite finden Sie eine Auflistung der verschiedenen Gutachten-Typen mit Hinweisen welche Prüfer die Eintragungen durchführen dürfen.
